

Apache Maven

Beginner to Guru

Assignment: Fix Broken Maven Project

Assignment: Fix Broken Maven Project

- Exercise with GitHub - you as the developer are performing a fix to an open source project
- GitHub link in course resources to a broken Maven project
- Fork Project to your GitHub account
- Check project out of your GitHub repository, correct problems, and commit
 - Should be able to run 'mvn clean install site' without errors
- Submit pull request for fix
- **NOTE:** Pull Requests will not be getting merged
 - Would clearly interfere with others taking the course!
